Education

Year of Passing	Degree/Course	University/Board	Percentage
2014	BE- ECE	Rungta college of Engineering and Technology	70.26%
2010	AISSCE (12th)	CBSE	58.00%
2008	AISSE (10 th)	CBSE	72.00%

Professional Summary

- **Experience of 9.5 years in the field of IT testing with specialization in Automation and Manual Testing.**
- Effectively **led a team of 12 members** and was responsible for overseeing an entire operational entity, ensuring seamless execution and strategic alignment.
- Strong Experience in **Automating** Web Application Testing using **playwright** with **Page Object Design Framework and Agile Methodologies**.
- Developed and maintained end-to-end test scripts using **Playwright and JavaScript** by creating playwright fixtures to minimize code duplication.
- Developed a comprehensive automated regression suite using **Playwright using JavaScript**, which helped in 50% reduction of manual testing efforts.
- In depth knowledge **Micro-services architecture and CI tools** like **Jenkins/GIT Hub Actions**.
- Participated in **Agile ceremonies**, including sprint planning, daily scrum-calls, retrospectives, **T-shirt sizing** call, 3 amigos and story grooming sessions.
- Involved in **Release Planning** -Created detailed release plan including **UAT and regression testing schedules**, ensuring all phases are completed on time and within scope resulting in successful release launches.
- Responsible for implementing and setup automation using playwright within the team, defining test objectives, developing testing strategies, review and optimization of test scripts and test results to enhance team efficiency and ensure **robust quality assurance**.
- Writing Test cases using Element locators, WebDriver methods, JavaScript programming features and custom playwright test Annotations.
- **Involved in** System testing, Cluster Integration testing, End 2 End, Regression testing, Back-end testing, Smoke testing, User-acceptance testing, DR testing and Quarantine testing.
- Extensive knowledge in Software Engineering Process and familiar with various Life Cycle Models like Waterfall, **Agile**.
- Knowledge of Test Planning, Test Case Design, Defect Management, **JIRA and EazyBi** Tool, CICD pipelines.

Technical Skills

- Automation Tools: **Playwright, TypeScript, JavaScript**.
- Programming Languages: Core Java, SQL (Basic knowledge).
- API Testing: **Using Postman**, Using Playwright
- Functional testing, Regression Testing.
- Test management tool: HP-ALM, JIRA and **Zephyr** plugin.
- Reporting: **JIRA Reporting** and **EazyBi**
- Defect Tracking Tool: **JIRA**, AR Tool.

Work History:

Around 9.5 years of IT experience in Infosys, Allianz Technologies and Cognizant Technologies as a Team lead having knowledge of both Functional and Automation Testing.

Below are the projects I have worked on:

Project #1

Title	ITMP
Client	Allianz Australia
Operating System	Windows 7, Windows 10
Tools	Playwright with Java Script, JIRA, Postman, Success Factor
Role	Automation/Manual Tester
Period	24th January 2019- Till date

Client Description

Allianz Australia Limited is a foreign-owned public company, providing general and life insurance services. The company employs about 4,300 people, operates throughout Australia and New Zealand, and is administered from its head office in Sydney.

Project Description

The Allianz Business System (ABS) is an integrated insurance system based on an enterprise data model and comprises a fully integrated CRM system in which about 5000+ test scenarios have been covered from various modules like Person, Policy, Claims, Payments, Financial transactions. All the E2E and regression test cases have been automated using **Playwright tool with JavaScript as the programming language**. **API testing** is performed using **Postman** for the third party glass repairers.

Roles and responsibilities:

- Led a team of 12 testers within Claims module.
- Implemented automation frameworks using **Playwright with JavaScript** as the programming language for efficient Regression and E2E testing.
- Involved in creating **Release plan** for the project including details and deadlines for UAT, regression testing, E2E testing and implemented In-sprint automation within the team.
- Involved in **story grooming sessions** with Onsite and cross functional team in understanding the business requirement.
- Developed comprehensive test strategies, test plans, and test cases for complex projects.
- Involved in daily scrum calls, sprint planning meetings, **T-shirt sizing**, retrospective meetings and **estimation** of the stories based on user story complexity.
- Participated in "**3 Amigos**" with the Business Engineers, PO and Developers and create acceptance Criteria for the user stories.
- Analysis of test requirement and automation feasibility.
- Functional Testing of **Web based Applications**.
- Collaborated closely with cross-functional teams to ensure timely delivery of defect-free software.
- Responsible for providing solutions for production incidents and **testing signoff**.
- Responsible for explaining the issues to the client and developers, **involved in brainstorming sessions** to discuss purposed solution with the cross functional team, **defect triage meetings** and logging issues in JIRA.
- Involved in **System testing, End 2 End, Regression testing, Exploratory testing, Ad hoc testing, Back-end testing, Smoke testing, User-acceptance testing, DR testing and Quarantine testing**.
- Conducted risk assessments and impact analysis to prioritize testing efforts.
- Responsible for timely escalation of issues to appropriate leads and managers to avoid slippage in delivery.
- Involved in requirement gathering, analysis and designing Test Scenarios, identification of test environment and configuration of required software for testing.

Selected Accomplishments

- Initiated PA call with Client to discuss the problem regarding defects.
- Created customized SQL query that fetches required fields from database which is helpful in creating Daily status report.
- Executing the TCCs (Test cases) in JIRA.
- Tracking Automated Daily Status Report through EazyBI.

Project #2

Title	HRT
Client	Allianz Austria
Operating System	Windows 7, Windows 10
Tools	Selenium WebDriver, Success Factor, HP ALM,
Role	Automation/Manual Tester
Period	3 rd . September 2018- 20 th January 2019

Success Factor is a web-based tool for managing employee details by HRS role. All the information of employee relating to Promotion, Transfer etc. is handled by HR. New data creation in the project is automated using Selenium Hybrid Framework. Data is stored in an excel file and fetched in the framework. There is client request of manipulating the data. The data manipulated is verified using CSV file. We have Austrian client involved in data manipulation and verification. All the defects are logged in HP ALM.

Roles and responsibilities:

- Involved in design and development of **Hybrid automation framework using selenium web driver**.
- Involved in writing test script using java and executed it through Selenium cucumber.
- Analysis of test requirement and automation feasibility.
- Functional Testing of **Web based Applications**.
- Explaining the issues to the client and developers and logging them in HP ALM.
- Writing test scenarios and test cases.

Project #3

Title	Process Testing
Client	T-Systems
Tools	SAP HCM, TWB, BMC Remedy Tool, CRM-T, Selenium WebDriver, JIRA
Role	Automation/Manual Tester
Period	8th June 2016- 14 th June 2018

Roles and responsibilities:

- Involved in design and development of **Hybrid automation framework using selenium web driver**.
- Involved in analyzing and understanding software requirements, specifications, and user stories to design test cases.
- Responsible for **Recording and documenting** the outcomes of test executions, including any issues or discrepancies found and log them into Jira.
- Worked with team to reproduce and analyse defects and provide feedback to in debugging and resolving issues.
- Prepared and presented test status reports, including Test execution results, Defect summaries, and Test coverage.
- Responsible for analyzing and ensuring comprehensive **Test coverage based on requirements and risk assessments**.
- Performed **exploratory testing** to identify edge cases and areas not covered by predefined test cases.
- Involved in creating the **Traceability Matrix** to map requirements to corresponding test cases and regularly updating the matrix to reflect changes in requirements, test cases, or project scope.

Declaration:

I hereby declare that all the above-mentioned details are true to the best of my knowledge.

Place: Pune
