Mini Project-II Synopsis

Semester: 4th AIML B (Session: Jan- jun. 26)

Name of the Students (With University Roll Number):

Name Omanshu Gupta	Roll No. 24250506064
Name Ravi Ranjan Yadav	Roll No. 242505069078
Name Sanskar Nandeshwar	Roll No. 242505069084
Name Saket Dewangan	Roll No. 242505069083
Name Sarvesh Singh	Roll No. 242505069085

Project Title..... Smart Movie Recommendation Website
.....

Synopsis of Project:

The Smart Movie Recommendation Website is designed to help users find movies based on their preferences such as genre, rating, and search input. Nowadays, users face difficulty in selecting movies due to the availability of a large number of options. This project provides a simple and effective solution to this problem by filtering and recommending movies according to user interest. The system takes input from the user and processes it using filtering logic.

Hardware/ Software Requirement:

HTML, CSS, JavaScript, Python (for backend logic)
Web Browser (Chrome, Edge, etc.)

Application of Project:

Helps users quickly find movies based on their interests, Reduces time spent searching for movies
Can be used in entertainment platforms, Useful for learning recommendation system concepts

Future work (Scope of work): Integration of AI and Machine Learning algorithms for better recommendations , Use of real-time movie database APIs, Addition of user login and personalized profiles

Name of the Project Coordinator: Neha Taori

Signature:
